Education

Chandubhai S. Patel Institute of Technology CHARUSAT

B.Tech in Computer Engineering (7.32 SGPA Sem 4)

Jul 2025 – Present

Changa, Gujarat

Government Polytechnic Ahmedabad

Diploma in Computer Engineering (8.21 CGPA)

Aug 2022- Jul 2025

Ahmedabad, Gujarat

Saint Mary's Secondary and Higher Secondary School

10th Board – Gujarat State Secondary Education Board (77%)

Mar 2020

Ahmedabad, Gujarat

Experience

ZAALIMA DEVELOPMENT PVT. LTD.

Data Science and Machine Learning Intern

May 2026 – July 2024

Remote, Bangalore

- Engineered and developed a machine learning pipelining using Python Scikit-Learn and Pandas to automate data analysis.
- Designed, trained, and evaluated predictive models, significantly improving processing efficiency for large datasets.

INFOLABZ IT SERVICES PVT. LTD.

Machine Learning Intern

Jun 2024 – Aug 2024

Ahmedabad, Gujarat

- Engineered and developed a machine learning pipelining using Python Scikit-Learn and Pandas to automate data analysis.
- Designed, trained, and evaluated predictive models, significantly improving processing efficiency for large datasets.

INFOLABZ IT SERVICES PVT. LTD.

Backend Developer Intern

Jan 2023 – Aug 2023

Ahmedabad, Gujarat

- Engineered robust backend architectures and RESTful APIs utilizing Python and the Django web frameworks.
- Build Live API integration systems and admin panels using Django.

Projects

Hostel Hub – Hostel Searching Portal | HTML, CSS, JavaScript, SUPABASE, Bootstrap

- HostelHub** is a modern, web-based hostel management system built for students and parents to find, compare, and manage college accommodation from their smartphones. It features smart hostel search with real-time room availability, a side-by-side comparison portal, a personalized student dashboard, real-time attendance tracking, mess menu management, a complaint/maintenance system, and smart notifications — all centered around a QR-code-first experience.
- On the technical side, it's built with vanilla HTML5, CSS3, and modern JavaScript on the frontend, with Supabase (PostgreSQL + Auth) handling the backend and database. The UI follows a premium design philosophy — dark mode by default, glassmorphism effects, smooth micro-animations, and a mobile-first layout. It's open source under the MIT License and easy to set up with just a Supabase account and a basic live server.

Contract Mind – AI-Powered Contract Intelligence & Risk Scoring | Python, FastAPI, Hugging Face, PyTorch, spaCy, LangChain, Docker

- Worked as part of a **4-member development team** during an internship to build an AI-powered contract intelligence platform that automates legal document analysis using Natural Language Processing (NLP) and Large Language Models (LLMs). The system processes PDF and Word contracts, extracts key legal entities, classifies critical contract clauses, performs semantic search, and identifies high-risk or anomalous language to assist legal and compliance teams.
- Contributed to building the end-to-end NLP pipeline using **Python**, **Hugging Face Transformers (BERT/RoBERTa)**, **spaCy**, and **PyTorch**, with **FastAPI** for REST APIs, **LangChain** and **Pinecone** for vector-based semantic search, **Celery** for asynchronous document processing, and **Docker** for deployment. Worked with the **CUAD (Contract Understanding Atticus Dataset)** to fine-tune transformer models for legal clause classification, implement Named Entity Recognition (NER), and improve contract review efficiency while reducing manual legal due diligence efforts.

Technical Skills

Programming Languages:

Python, SQL, C++, Java

Data Science & Machine Learning:

NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, XGBoost, OpenCV, NLP, Feature Engineering, Model Evaluation

Data Visualization:

Matplotlib, Seaborn, Plotly, Power BI, Tableau

Databases:

MySQL, PostgreSQL, SQLite, MongoDB, Supabase

Tools & Technologies:

Git, GitHub, Jupyter Notebook, Google Collab, VS Code, Linux (Ubuntu), Docker, MLflow

Big Data:

Apache Spark, Hadoop, PySpark

Courses

Data Analysis in Python <i>Coursera – IBM</i>	Mar 2026
Algorithm Design: Mastering Computational Problem Solving <i>Coursera – BITS Pilani</i>	Mar 2026
The Complete FullStack Web Development <i>Udemy – Dr. Angela Yu</i>	Mar 2026
Foundations of Data Structures and Algorithm Analysis <i>Coursera – Packt</i>	Sep 2025
Building Web Applications In PHP <i>Coursera – University of Michigan</i>	Sep 2025
Java Class Library <i>Coursera – LearnQuest</i>	Aug 2025

Achievements

- Secured **Third** Place in **HACKTRACK** (College Hackathon) — demonstrated strong problem-solving skills, innovative thinking, and effective teamwork under time-constrained competitive conditions.
